Dear Parent / Carer,

I am writing to let you know that Hackney schools will be delivering a lesson over the coming weeks, to pupils in Key Stages 2 to 5, relating to Covid-19 vaccines and the ongoing programme of vaccination in the UK.

The teaching resources for this lesson have been developed by Hackney teachers and education specialists and are designed to improve pupils' understanding of why the Covid-19 vaccination programme is so important, and to address any gaps in scientific knowledge or misconceptions around the vaccine. The resources for this lesson are found at the website below:

<https://www.hackneyservicesforschools.co.uk/extranet/vaccination-resources>

These resources have been planned in conjunction with the Keep London Safe Campaign, a pan-London campaign, designed to reach communities across the capital by sharing key national public health messages around Covid-19. It is very important that all our communities across London feel confident to access the vaccine, to prevent serious illness, and save lives.

I hope your child finds this lesson, as part of his or her Science curriculum, both informative and useful.

Yours sincerely

A handwritten signature in black ink that reads 'Annie Gammon'.

Annie Gammon
Director of Education
